Key milestones to ensure readiness
when managing the Entry-into-Service of new A/C types
Key milestones to ensure readiness when managing the Entry-into-Service of new A/C types

A350 Entry-into-Service Project Management
Individual management and intensive interfacing
Key milestones to ensure readiness when managing the Entry-into-Service of new A/C types

**A350 Entry-into-Service Project Management**

Starts with design and ends with stable operation

- Participation in the Airbus [A350 Customer Focus Group](#).
- Supporting Airbus in the [A350 Airline Office](#) in Toulouse with respect to maturation and maintainability.

- Briefing by the [Airbus Program Management](#) on development/certification progress.
- Organization and processes to be prepared for readiness.

- Follow-up of first [A350 in-service experience](#) based on available data.
- Continuous trainings and mitigation actions.

- Securing best A/C availability tailored to the airline’s requirement through a reliable technical dispatch eliminating delays.
Proper preparation ensures operational reliability through investments in A350 capability readiness
Proper preparation ensures operational reliability through investments in early A350 capability readiness

**Emphasizing A350 readiness**

Well-planned investment prevent operational issues

**Material Investment**

**Firsthand Experience**

**Maintenance Readiness (Routine)**

**OEM Cooperation**

**Maintenance Readiness (AOG)**

**A/C Availability**

**Honeywell**
